**MP221:** Every hunter has had the dream of walking on the African plains holding a side by side rifle, ready to face down some big game. We can't sell you the African plains or the big game, but we can sell you the MP221. Baikal realized that you could not make a reasonably priced side by side rifle with the traditional method of barrel regulation, and came up with an elegant solution. Sight in one barrel and adjust the second barrel point of impact via a jackscrew between the barrels.
