

ZASTAVA RIFLES

Z98: The Mauser 98 set the standard for bolt action rifle actions a long time ago. For years you could only find this action in surplus military guns. To make a hunting rifle out of one of the surplus actions you had to get a custom gunsmith. Now you do not need a custom gunsmith to build your Mauser action hunting rifle. Just go down to your local gun shop and order a Z98 in the caliber of your choice.

Previously these actions/rifles were sold under various other names.

Features: Control Round Feed, Solid Steel Floor Plate, Forged & Machined Steel Trigger Guard, Forged And Machined Steel Receiver, Hammer Forged Steel Barrel, Forged And Machined Steel Bolt, Forged And Machined Steel Bolt Handle, Superior Strength, Smooth, Reliable Cartridge Feed & Inherent Accuracy, Large Claw Extractor, Positive Thumb Safety, Non Glare Finish, See Chart Below for Options, Models & Scope Mounts

Z5: The Model Z5 by Zastava has been called one of the best rimfire bolt action rifles on the market today. To make a fine rimfire rifle you need to cut some metal. The Z5 is all machined steel, not plastic like the competition. The Z5 is true old world craftsmanship. Out of the box dependable and accurate and affordable without sacrificing quality. Previously sold in North America under several names and model numbers.

Features: Smooth Solid Steel Bolt Action, 22" Blued Barrel, 16 1/2" Barrel On Youth Model, Five-shot Detachable Magazine, Adjustable Rifle Sights, Receiver Grooved For Scope Mounts
